1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James R. Foley on October 18, 2004.

The application has been amended as follows:

Regarding claim 1, in line 16, replace "waiting in a buffer" with –waiting in a transmit buffer--, in line 21, replace "in the buffer" with –in the transmit buffer--, in line 31, strike "when no data is received", and, in line 32, strike "from the narrowband network".

Regarding claim 2, in lines 3-4, the phrase "storing the demodulated data to be transmitted over the narrowband network in a transmit buffer;" is stricken, and, in line 5, "comparing an amount" is replaced by –comparing the amount—.

Claim 4 is CANCELED.

Regarding claim 5, in line 1, replace "according to claim 4" with --according to claim 1--, and, in line 8, replace "from an RR frame" with --from a RR frame--.

Regarding claim 7, in line 3, replace "data in a transmit buffer" with –data in the transmit buffer--.

Regarding claim 9, in line 5, replace "modulated signal instead" with –modulated signals instead--.

Regarding claim 11, in line 6, replace "adjusting duration" with –adjusting a duration--, and, in line 8, replace "adjusting duration" with –adjusting a duration--.

Regarding claim 15, in line 3, replace "selecting at the first and second gateways" with -selecting at each of the first and second gateways--.

Regarding claim 16, in line 3, replace "V.8answer" with -- V.8 answer--.

Regarding claim 22, in line 2, replace "V.8sequence" with –V.8 sequence--.

Regarding claim 24, line 7, "receiving the modified demodulated data at the second gateway;", is stricken, and replaced as line 11. Thereby, "receiving the modified demodulated data at the second gateway;" is inserted between the instant line 10, "transmitting the modified demodulated data...", and the instant line 11, "regenerating the demodulated data..." as the new line 11.

The following listing of claim 29 replaces the current listing of claim 29 in the file in its entirety.

29. A gateway for voice band data transmission over a network comprising a first modem connected to the gateway, a second modem connected to a second gateway, and a narrowband network connecting the gateway and the second gateway, the gateway comprising:

Art Unit: 2634

a voice band data modem for demodulating signals received from a first user modem to generate demodulated data for transmission over the narrowband network, and for modulating data received from the narrowband network;

a voice band data protocol for inter-networking of the first and second modems;

a memory having a memory size; and

size of the memory.

a partial V.42 protocol for:

detecting establishment of an end-to-end error correcting protocol between the first and second moderns, monitoring at the first gateway the demodulated data, suspending transmission of the signals from the first modern if a transmission rate of the demodulated data to be transmitted over the narrowband network exceeds a first value, and resuming transmission of the signals from the first modern if the transmission rate is less than a second value, and further comprising a memory having a memory size, and wherein the partial V.42 protocol further comprises logic for: modifying supervisory data received from the narrowband network so that a maximum message length transmitted between the first and the second moderns is less that a predetermined limit based on the

a maximum message length transmitted between the first and the second modems is less than a predetermined limit based on the size of the memory.

Regarding claim 35, in line 29, replace "adjusting duration" with –adjusting a duration--, and, in line 31, replace "adjusting duration" with –adjusting a duration--.

Claims 1, 2, 5, 7-33, and 35-36 are renumbered as claims 1-32 respectively, and the claim dependency is amended accordingly.

Allowable Subject Matter

- 2. Claims 1, 2, 5, 7-33, and 35-36 renumbered as claims 1-32, respectively, are allowed.
- 3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason M Perilla whose telephone number is (571) 272-3055. The examiner can normally be reached on M-F 8-5 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Chin can be reached on (571) 272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
